Office Action Summary	Application No. 10/665,395	Applicant(s) BUTLER ET AL.	
	Examiner Anu Ramana	Art Unit 3733	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election of the invention of Group I (claims 1-37) and species V (Figs. 43-46) in the response filed on November 2, 2006 is acknowledged. Because Applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP §818.03(a)). Claims 1-8 and 14-16 have been examined on the merits in this office action.

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings submitted on November 21, 2004 do not clearly show details of Applicants' invention. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 2-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, line 2, the functional recitation, "for mounting the retractor to the insertion device", is indefinite because it is not supported by recitation in the claim of sufficient structure to accomplish the function. Is the insertion device the same as the insertion tool?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Moll et al. (US 5,865,728).

Moll et al. disclose a wound retractor system including a retraction device 1 and a gripping or insertion tool for manipulating and repositioning retraction device 1 (Fig. 1, col. 8, lines 57-67, col. 9, col. 10, lines 1-22 and col. 11, lines 4-19).

Claims 1-8 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Klein et al. (US 4,488,877).

Klein et al. disclose a retractor (10, 12) including: a sleeve or retracting member 12; a receiver 44 so that the retractor may be held by an insertion tool or forceps; a forceps 100; and a distal ring member 18 mounted to the retracting member (Fig. 1, col. 2, lines 60-68, col. 3, lines 1-38 and col. 4, lines 5-11). Also see Fig. 14, col. 8, lines 51-68 and col. 9, lines 1-9 of Martinez et al. (US 4,776,843) incorporated by reference in Klein et al.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klein et al. (US 4,488,877).

Klein et al. disclose all elements of the claimed invention except for the specific ranges of dimensions.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made forceps 100 with the claimed ranges of dimensions, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
